

CON

A 3D isometric illustration of a medical professional in a white lab coat and stethoscope, standing next to a large screen displaying a graph with a p-value threshold of $P < 0.001$. The screen also shows a brain scan image. A beaker with red liquid sits on a stand to the left. A clock and a yellow block are visible in the background.

A close-up illustration of a person's hand holding a white blister pack containing several blue and yellow capsules. The hand is positioned in the lower right corner of the slide.

FDA para su aprobación

Si se observan **resultados positivos** en las tres fases del ensayo clínico, la compañía farmacéutica presenta una solicitud ante la FDA. La FDA revisa todos los resultados de los ensayos y decide si el medicamento será aprobado.

A stylized illustration of a hand holding a dark blue medicine bottle. Three yellow and blue capsules are falling out of the bottle and into a white, rounded-bottom cup below. The background is a light teal color.
